ITC 2022 Poster Submission Is Open

The poster submission deadline for ITC 2022 has been extended to June 27, 2022. To submit a poster proposal, please prepare a one- or two-page write-up about the poster work. The ITC poster write-up should follow the same IEEE conference paper format where the templates for Word and Latex can be found at IEEE site:

https://www.ieee.org/conferences/publishing/templates.html

The Call-for-Papers (including the posters) is attached in the next page.

Submission To Tracks By Invitation Only

If a track is marked as "By Invitation Only", please do not submit to this track, unless you have received specific instruction to invite you to submit a paper to this track. These tracks are dedicated for special sessions decided by the Program Chair.

Regular Paper Submission Has Closed!
The International Test Conference (ITC) is the world’s premier venue dedicated to the electronic test of devices, boards and systems—covering the complete cycle from design verification, design-for-test, design-for-manufacturing, silicon debug, manufacturing test, system test, diagnosis, reliability and failure analysis, and back to process and design improvement.

Emerging technologies in design and manufacturing will require new test solutions. Artificial Intelligence (AI) and the need for trustworthy devices are providing both new challenges and new opportunities for off-chip and on-chip test. At the same time, more stringent quality requirements, especially in automotive applications, are requiring more efficient test, debug, monitoring, and repair techniques that can transfer to the field.

Authors are invited to submit original, unpublished papers describing recent work in the field of testing and testable design. Of particular interest are works dedicated to the topics listed on the right and/or works focused on special tracks such as Automotive, 5G/6G, AI, or Security. Authors are also invited to submit practical, industry oriented papers. A special industrial case-study track is dedicated to papers that enable others to learn best industrial practices. Submissions simultaneously under review or accepted by another conference, symposium or journal, will be summarily rejected. The submission is through the EasyChair paper submission system.

Submissions must include:
- Title of paper.
- Name, affiliation, e-mail address of each author.
- The corresponding author(s). ITC will communicate with the corresponding author(s).
- One or two topic(s) from the topic list, or a description of your topic.
- An electronic copy of a complete paper of 6-10 pages for regular papers (including Industrial case-study papers) or 3-5 pages for short Industrial Practices papers.
- An abstract of 35 words or less to be entered online.

ITC maintains a competitive selection process for technical papers. Submissions must clearly describe the status of the paper, its contribution, novelty and/or significance. Supporting data, results (priority is often given to papers with results from real designs) and conclusions, and references to prior work must also be included. ITC does not accept submissions that do not meet the specified criteria.

</tr>
</tbody>
</table>

Authors are also invited to submit a one- or two-page poster proposal. Posters are a useful way of presenting late-breaking results, getting feedback on an innovative method, or participating without having to write a full paper. Acceptance as a poster does not preclude submission of a more complete paper as an ITC paper in 2023. Additional information on poster submissions will be provided on the ITC web page.
